089654933753 | syahrulalhabib@gmail.com | https://www.linkedin.com/in/syahrulalhabib | https://github.com/Syahrulalhabib
Jakarta, Indonesia

Innovative Informatics Engineering graduate specializing in Web Development, certified in Google Cloud and Cybersecurity. Skilled in building functional web applications using Python, JavaScript, and Firebase, with a focus on cloud deployment, workflow automation, and secure web solutions.

EDUCATION

Muhammadiyah University of Jakarta - Cempaka Putih, Central Jakarta Sept 2022 - July 2026
GPA: 3.60/4.00
Actively focusing on Software Engineering, Cloud Computing, and Cybersecurity while utilizing technologies such as Python, JavaScript, Linux, and SQL across academic projects. Architected and developed a web-based IT Project Management Information System for the final thesis project applying the Waterfall software engineering methodology, Firebase real-time data synchronization, and n8n workflow automation. Successfully collaborated on various individual and team academic initiatives, Successfully collaborated on various individual and team academic initiatives while actively honing cybersecurity expertise through the CoreIT student community.

Bangkit Academy Sept 2024 - Dec 2024
Cloud Computing Cohort
Completed an intensive program focused on designing, deploying, and managing cloud-based solutions using Google Cloud technologies. Developed the 'Everin App' capstone project, taking full responsibility for designing backend API endpoints, building scalable cloud architectures, and deploying the application using Google Cloud Platform (GCP) and Cloud Run.

WORK AND ORGANIZATIONAL EXPERIENCE

Laboratory Assistant - Muhammadiyah University of Jakarta
Network Security Nov 2025 - Jan 2026

- Authored and standardized 5 comprehensive practical modules and presentation materials covering core cybersecurity concepts such as ethical hacking, encryption, and network analysis.
- Directed hands-on laboratory sessions for 16 students, facilitating advanced practical simulations using Kali Linux and Nmap for network reconnaissance and traffic analysis.
- Mentored students through complex security scenarios (MITM, HTTP, DoS/DDoS) and evaluated their practical coursework, providing constructive feedback that measurably improved their comprehension of network defense strategies.

Software Designer Intern - PT Astra Daihatsu Motor
Corporate Sustainability Division Jul 2025 - Sept 2025

- Created mockp design for the digitalization application used in the Corporate Sustainability Division to support workflow efficiency and data accessibility.
- Designed user interface flows and visual components that aligned with corporate standards and user needs.
- Developed analytical dashboards using Power BI to present sustainability and operational data in a clear and actionable format.
- Collaborated with division stakeholders to translate business requirements into intuitive UI solutions and effective data visualizations.

Mentor Informatics Bootcamp 2025
Cloud Computing Mentor 20 Mar - 15 May 2025

- Provides fundamental to advanced understanding of Cloud Computing, including the concepts of IaaS, PaaS, and SaaS and their applications.

- Conduct hands-on practice in each learning session using the Google Cloud Platform (GCP) platform, including services such as Compute Engine, App Engine, and Cloud Run.
- Provided guidance, feedback, and career development advice to participants to improve their technical skills and readiness to face challenges in the cloud computing industry.

Community of Research & Innovation Technology (CoreIT) - Cempaka Putih, Central Jakarta
Cyber Security
- Understand the basics of cybersecurity.
- Proficient in the operation and use of Linux to support system administration and management tasks.
- Experienced in Capture The Flag (CTF), honing skills in solving hands-on cybersecurity challenges.

GEMASTIK XVII (2024) & XVIII (2025)
Participant in the Cyber Security division of the GEMASTIK 2024 competition.
- Represented the university in competitive national-level technology events, focusing on ethical hacking, penetration testing, and digital forensics.
- Strategized and executed real-time solutions for complex Capture The Flag (CTF) puzzles under tight time constraints, enhancing problem-solving and teamwork skills.

PROJECTS

Final Thesis Project - Project Management Information System
SIMP
- Architected and developed a web-based Project Management Information System utilizing the Waterfall software engineering methodology.
- Successfully integrated Firebase for real-time data synchronization and n8n for task workflow automation.
- Implemented granular Role-Based Access Control (RBAC) and Firebase security rules to ensure secure data access across PM, Member, and Viewer roles.

Personal Project - Personal Finance Management System
Pocketplan
- Architected and developed a full-stack personal finance web application utilizing React, Node.js, Express, and Firebase for real-time data synchronization.
- Successfully integrated a two-way Telegram Bot powered by Google Gemini AI for automated receipt OCR scanning and natural-language transaction tracking.
- Engineered end-to-end security and reliability with Helmet, rate limiting, and 40+ automated unit and Playwright E2E test suites deployed on Vercel via Cloudflare.

Freelance Project - Corporate Company Profile Web Platform
PT Ziotech Global Inovasi
- Engineered a full-stack corporate web platform with multi-page routing and a comprehensive CMS admin dashboard for real-time content management via Firebase Realtime Database.
- Built dynamic service & project detail pages with client-side routing, responsive design across all viewports, and professional UI animations using Framer Motion.
- Implemented Firebase-backed admin panel featuring image upload/cropping, CRUD operations for all content sections, and an integrated contact inbox system.

Freelance Project - Corporate Merchandise Landing Page
Paperink Official
- Designed and developed a modern single-page landing page featuring an interactive hero slider, multi-category product catalog, client portfolio gallery, and conversion-optimized CTA banners.
- Implemented dark/light mode, scroll-reveal animations, and WhatsApp business inquiry integration for direct client engagement.
- Engineered lightweight architecture with zero external dependencies beyond React, utilizing custom hooks and anchor-based smooth navigation for optimal performance.

Capstone Project - Bangkit Academy
Everin App

- Designed and implemented backend API endpoints to support core application functionalities.
- Developed a scalable and secure cloud architecture to ensure optimal performance.
- Deployed the application using Google Cloud Platform and Cloud Run for efficient resource management and high availability.
- Implemented cloud storage solutions to efficiently manage and store image data for the application.

CERTIFICATIONS

- Google Cybersecurity Professional Certificate (Coursera, 2025)
  Verify: https://coursera.org/verify/professional-cert/SLM1JHO6EPYZ
- Google Cloud Skill Boost Badges (Google Cloud Skill Boost, 2024)
  Verify at: https://www.cloudskillsboost.google/public_profiles/081c2a62-205e-40a0-981d-dc2839fa8948
- Google Cloud Computing Foundations Certificate (Google Cloud Skill Boost, 2024)
  Verify at: https://www.credly.com/badges/d8aa435a-22d1-41de-a284-1c4cc783583c/public_url
- Belajar Dasar Pemrograman Web (Dicoding, 2024)
  Verify at: https://www.dicoding.com/certificates/1OP8WQ11QXQK
- Belajar Dasar Pemrograman JavaScript (Dicoding, 2024)
  Verify at: https://www.dicoding.com/certificates/1RXY2E08KXVM
- Belajar Membuat Aplikasi Back-End untuk Pemula dengan Google Cloud (Dicoding, 2024)
  Verifiy at: https://www.dicoding.com/certificates/53XEQKV3KXRN
- Menjadi Google Cloud Engineer (Dicoding, 2024)
  Verify at: https://www.dicoding.com/certificates/MRZMYV18NZYQ
- Belajar Dasar AI (Dicoding, 2024)
  Verify at: https://www.dicoding.com/certificates/0LZ04E2L0P65
- Belajar Penerapan Machine Learning dengan Google Cloud (Dicoding, 2024)
  Verify at: https://www.dicoding.com/certificates/4EXG7RJLQPRL

SKILLS

Softskills: Leadership, Growth Mindset, Critical Thinking, Problem Solving, Project Management, Time Management, Adaptability and Resilience.
Hardskills: Google Cloud Platform, Cloud Computing, Cyber Security, Linux, Python, Node.js, React.js, Waterfall Methode.
